# AxisAndOhs Installation

**Distribution**

Lorby AxisAndOhs is distributed as self-extracting installer packages, individual for every simulator.

**Installation**

– This application requires the .Net 4.8 Runtime and the VC++ Redist 2019 to be present on your computer.

**AntiVirus**

Some customers reported problems with AntiVirus programs blocking the AxisAndOhs installers. This behaviour is quite normal today unfortunately, as most AntiVirus software applies the simple rule "I don't know you, so you must be bad".

To avoid problems with AntiVirus (AVAST is especially violent) please exclude the AxisAndOhs installer and executables from the AntiVirus scan.

**Running the installer:**

On the first page you may select optional installation targets:

- "Start Menu Shortcuts": Lorby AxisAndOhs will be added to your Start Menu (advised)

- Selecting "Install" will begin the installation
